# INSTRUCTION MANUAL

## **Quick-RNA™ MicroPrep**

Catalog Nos. **R1050 & R1051**

### **Highlights**

- High-quality total RNA (including small RNAs) from a wide range of samples – single to 10<sup>6</sup> cells.
- Isolate small and large RNAs into separate fractions (optional).
- *DNA-free* RNA for use in any downstream application. *DNase I included.*

Satisfaction of all Zymo Research products is guaranteed. If you should be dissatisfied with this product please contact us.

Some difficult-to-lyse samples may require mechanical or enzymatic homogenization. For assistance, contact us at [tech@zymoresearch.com](mailto:tech@zymoresearch.com).

For  $10^2$  to  $10^7$  cells, use the **Quick-RNA™ MiniPrep** (Cat. Nos. R1054, R1055).

## Product Contents

<b>Quick-RNA™ MicroPrep</b> (Kit Size)	<b>R1050</b> (50 Preps.)	<b>R1051</b> (200 Preps.)
<b>RNA Lysis Buffer</b>	50 ml	2x 100 ml
<b>RNA Prep Buffer</b>	25 ml	100 ml
<b>RNA Wash Buffer<sup>1</sup></b> (concentrate)	24 ml	2x 48 ml
<b>DNase/RNase-Free Water</b>	4 ml	10 ml
<b>DNase I<sup>2</sup></b> (lyophilized)	1	4
<b>DNA Digestion Buffer</b>	4 ml	16 ml
<b>Zymo-Spin™ IC Columns</b>	50	200
<b>Collection Tubes</b>	50	200
<b>Instruction Manual</b>	1	1

Note - Integrity of kit components is guaranteed for up to one year from date of purchase. Reagents are routinely tested on a lot-to-lot basis to ensure they provide the highest performance and reliability.

**Storage Temperature** - Store all kit components (*i.e.*, buffers, columns) at room temperature. Store reconstituted DNase I at -20 °C.

<sup>1</sup> Before use, add 96 ml 100% ethanol (104 ml 95% ethanol) to the 24 ml **RNA Wash Buffer** concentrate or 192 ml 100% ethanol (208 ml 95% ethanol) to the 48 ml **RNA Wash Buffer** concentrate.

<sup>2</sup> Prior to use, reconstitute the lyophilized **DNase I** as indicated on the vial. Store frozen aliquots.

## Specifications

**Sample Sources** – Cells or tissue samples, yeast, plant or bacteria. Compatible with DNA/RNA Shield™ and RNA/ater™.

**Sample Storage** – Samples homogenized in RNA Lysis Buffer are stable and can be stored frozen prior to purification.

**Sample Size** – Up to  $10^6$  cells or 5 mg tissue.

**RNA Purity** – High quality RNA ( $A_{260}/A_{280} > 1.8$ ,  $A_{260}/A_{230} > 1.8$ ) suitable for all downstream RNA-based manipulations.

**RNA Recovery** – Up to 10 µg RNA can be eluted into ≥6 µl RNase-free water allowing for a highly concentrated sample.

**RNA Storage** – RNA is eluted with RNase-free water and can be stored frozen. RNase inhibitors can be included for prolonged storage.

**Equipment Needed** – Microcentrifuge.

Note - ™ Trademarks of Zymo Research Corporation. This product is for research use only and should only be used by trained professionals. It is not intended for use in diagnostic procedures. Some reagents included with this kit are irritants. Wear protective gloves and eye protection. Follow the safety guidelines and rules enacted by your research institution or facility. RNA/ater™ is a trademark of Ambion, Inc., Austin, Texas and is protected by various U.S. and foreign patents.

## Product Description

The **Quick-RNA™ MicroPrep** kit is an innovative product designed for the easy, reliable, and rapid isolation of DNA-free RNA from a wide range of cell (*up to 10<sup>6</sup>*) and tissue samples (*up to 5 mg*). The procedure combines a unique buffer system with Clean-Spin™ column technology to yield high quality total RNA (*including small RNAs 17-200 nt*) in about 10 minutes.

The procedure is simple: Add the provided **RNA Lysis Buffer** to a sample, then purify the RNA using the **Zymo-Spin™ Columns**. The result is highly-concentrated, **DNA-free** RNA that is suitable for subsequent RNA-based methods including RT-PCR, hybridization, sequencing *etc.* In addition, the kit can be used for enrichment of small and large RNAs in two separate fractions (page 5).

The **Quick-RNA™ MicroPrep** yields high quality total RNA. High levels of genomic DNA contamination are present in the preps from Suppliers Q & P but not with the **Quick-RNA™ MicroPrep**. Total RNA was isolated from human epithelial cells (sans DNase treatment).

RNA isolated with the **Quick-RNA™ MicroPrep** is DNA-free. Samples isolated with Supplier Q's kit are provided for comparison. Total RNA was isolated from 10<sup>6</sup> human epithelial cells (with in-column DNase treatments for both kits). Each amplification curve represents an average of three independent isolation experiments.

For **Assistance**, please contact Zymo Research Technical Support at 1-888-882-9682 or e-mail [tech@zymoresearch.com](mailto:tech@zymoresearch.com).

### Notes:

Use the **Direct-zol™ RNA MiniPrep** (Cat. Nos. R2050, R2051, R2052, R2053) for isolation of RNA **directly** (without phase separation) from samples in Trizol®, *etc.*

Use the **DNA/RNA Shield™** for safe sample storage and transport at ambient temperatures.

The **Quick-RNA™** kits yield high quality RNA with high "RNA Integrity Numbers" (2200 TapeStation, Agilent).

## ZYMO RESEARCH CORP.

Phone: (949) 679-1190 • Toll Free: (888) 882-9682 • Fax: (949) 266-9452 • [info@zymoresearch.com](mailto:info@zymoresearch.com) • [www.zymoresearch.com](http://www.zymoresearch.com)

Ensure the RNA isolation procedure is performed in an RNase-free environment.

#### Notes:

Samples homogenized in **RNA Lysis Buffer** can be stored frozen for processing at a later time.

**ZR Bashing Bead™ Lysis Tubes** are available separately (Cat. Nos. S6002, S6003).

Processing plant tissue and other samples containing polyphenolics, humic acids, melanin, etc. may require use of the **OneStep™ PCR Inhibitor Removal Kit** (Cat. No. D6030).

Use the **DNA/RNA Shield™** for safe sample storage and transport at ambient temperatures.

## Buffer Preparation

- ✓ Before starting, add 96 ml 100% ethanol (104 ml 95% ethanol) to the 24 ml **RNA Wash Buffer** concentrate (R1050) or 192 ml 100% ethanol (208 ml 95% ethanol) to the 48 ml **RNA Wash Buffer** concentrate (R1051).
- ✓ Reconstitute the lyophilized **DNase I** as indicated on the vial prior to use and store aliquots at -20°C.

## Protocols

The RNA isolation consists of three steps: (I) *Sample Lysis/Homogenization*, (II) *Sample Clearing* and (III) *RNA Purification*.

All steps should be performed at room temperature (20-30 °C).

### I. Sample Lysis/Homogenization

Recommended **RNA Lysis Buffer** volumes

<b>RNA Lysis Buffer</b>	<b>100 µl</b>	<b>300 µl</b>
Cells	Up to 10 <sup>5</sup>	Up to 10 <sup>6</sup>
Tissue	-	Up to 5 mg

#### Adherent Cells

Lyse cells directly in the culture container by removing liquid medium and adding **RNA Lysis Buffer** directly to the monolayer.

#### Cells in Suspension

Pellet cells ( $\leq 500 \times g$ ), remove the supernatant completely then resuspend the cell pellet in **RNA Lysis Buffer**. Vortex briefly.

#### Tissue and Tough-to-Lyse Samples

Fresh or frozen tissue (animal, plant, insect, yeast or bacteria) can be mechanically homogenized (e.g., **ZR Bashing Bead™ Lysis Tubes**) directly in the **RNA Lysis Buffer**.

Alternatively, tough-to-lyse tissue samples can be Proteinase K treated (page 5).

#### Liquids/Reaction Clean-up

DNase-treated RNA, labeling and *in vitro* transcription reactions can be processed directly by adding 4 volumes of **RNA Lysis Buffer** to each volume of sample (4:1) then mixing well.

#### Samples in DNA/RNA Shield™

Bring samples homogenized and stored in **DNA/RNA Shield™** to room temperature (20-30 °C). Then add 1 volume **RNA Lysis Buffer** (1:1), mix and proceed with Sample Clearing step.

Samples in DNA/RNA Shield™ can be Proteinase K treated (page 5).

#### Samples in RNA/ater™

To process cells or liquids in **RNA/ater™** (without reagent removal): Add 1 volume of RNase-free water or PBS to the sample (1:1). Then add 4 volumes **RNA Lysis Buffer** (4:1) and mix.

Alternatively, remove the **RNA/ater™**, then proceed with Sample Lysis/Homogenization according to the sample type.

## ZYMO RESEARCH CORP.

Phone: (949) 679-1190 • Toll Free: (888) 882-9682 • Fax: (949) 266-9452 • info@zymoresearch.com • [www.zymoresearch.com](http://www.zymoresearch.com)

## II. Sample Clearing

The following is recommended for cells and tissue (animal/plant) but can be omitted for cell-free liquids and low input samples ( $\leq 10^5$  cells).

For particulate removal, centrifuge lysates at  $\geq 12,000 \times g$  for 1 minute. Then transfer the supernatant into an RNase-free tube (*not provided*).

## III. RNA Purification

All centrifugation steps should be performed at 10,000-16,000  $\times g$ .

1. Add 1 volume ethanol (95-100%) to the sample in **RNA Lysis Buffer** (1:1). Mix well.
2. Transfer the mixture to a **Zymo-Spin™ IC Column**<sup>1</sup> in a **Collection Tube** and centrifuge for 30 seconds. Discard the flow-through.
3. **In-column DNase I Treatment** (optional)

This step can be used for trace DNA removal.

- a. Prewash the column with 400  $\mu$ l **RNA Wash Buffer**. Centrifuge for 30 seconds. Discard the flow-through.
- b. For each sample to be treated, prepare **DNase I Reaction Mix** in an RNase-free tube (*not provided*). Mix well by gentle inversion:

<b>DNase I</b> <sup>2</sup>	5 $\mu$ l
<b>DNA Digestion Buffer</b>	35 $\mu$ l

- c. Add 40  $\mu$ l **DNase I Reaction Mix** directly to the column matrix. Incubate at room temperature (20-30 °C) for 15 minutes. Then centrifuge for 30 seconds.

4. Add 400  $\mu$ l **RNA Prep Buffer** to the column and centrifuge for 30 seconds. Discard the flow-through.
5. Add 700  $\mu$ l **RNA Wash Buffer** to the column and centrifuge for 30 seconds. Discard the flow-through.
6. Add 400  $\mu$ l **RNA Wash Buffer** and centrifuge the column for 2 minutes to ensure complete removal of the wash buffer. Transfer the column carefully into an RNase-free tube (*not provided*).
7. Add 15  $\mu$ l **DNase/RNase-Free Water** directly to the column matrix and centrifuge for 30 seconds.

Alternatively, for highly concentrated RNA use  $\geq 6$   $\mu$ l elution.

The eluted RNA can be used immediately or stored at -70°C.

### Notes:

<sup>1</sup> To process samples >700  $\mu$ l, **Zymo-Spin™** columns may be reloaded.

<sup>2</sup> Prior to use, reconstitute the lyophilized **DNase I** as indicated on the vial. Store frozen aliquots.

*Unit definition - one unit increases the absorbance of a high molecular weight DNA solution at a rate of 0.001  $A_{260}$  units/min/ml of reaction mixture at 25°C.*

### ZYMO RESEARCH CORP.

Phone: (949) 679-1190 • Toll Free: (888) 882-9682 • Fax: (949) 266-9452 • info@zymoresearch.com • [www.zymoresearch.com](http://www.zymoresearch.com)

**Notes:**

<sup>1</sup> Adjust the sample volume to 50 µl (minimum).

<sup>2</sup> **Zymo-Spin™** columns may be reloaded to process samples >700 µl.

<sup>3</sup> **2X Digestion Buffer** (Cat. No. D3050-1-5 and D3050-1-20).

<sup>4</sup> **Proteinase K** (Cat. No. D3001-2-5 and D3001-2-20).

*One unit of enzyme will hydrolyze urea-denatured hemoglobin to produce 1.0 µmole of tyrosine per minute at pH 7.5 at 37°C.*

## Purification of Small and Large RNAs into Separate Fractions

This procedure is compatible with animal cell inputs (up to 10<sup>6</sup>) or previously isolated RNA only.

All centrifugation steps should be performed between 10,000-16,000 x g.  
This protocol requires two columns (per prep).

1. Mix an equal volume of **RNA Lysis Buffer** and ethanol (95-100%).  
Example: Mix 50 µl buffer and 50 µl ethanol.
2. Add 2 volumes of the buffer/ethanol to an RNA sample<sup>1</sup> or 300 µl buffer/ethanol to a cell pellet and mix.  
Example: Mix 100 µl buffer/ethanol and 50 µl sample.
3. Transfer the mixture<sup>2</sup> to the **Zymo-Spin™ Column** and centrifuge for 30 seconds. **Save the flow-through!**

**Column:** RNAs >200 nt

4. Continue to step 5.

**Flow-through:** RNAs 17-200 nt

Add 1 volume ethanol and mix.

Example: Add 150 µl ethanol to 150 µl flow-through.

Transfer the mixture to a new column and centrifuge for 30 seconds. Discard the flow-through.

5. Add 400 µl **RNA Prep Buffer** to the column and centrifuge for 30 seconds. Discard the flow-through.
6. Add 700 µl **RNA Wash Buffer** to the column and centrifuge for 30 seconds. Discard the flow-through.
7. Add 400 µl **RNA Wash Buffer** and centrifuge the column for 2 minutes to ensure complete removal of the wash buffer. Transfer the column carefully into an RNase-free tube (not provided).
8. Add 15 µl **DNase/RNase-Free Water** directly to the column matrix, then centrifuge for 30 seconds.

Alternatively, for highly concentrated RNA use ≥6 µl elution.

The eluted RNA can be used immediately or stored at -70°C.

Total RNA (>17 nt), large (>200 nt) or small RNAs (17-200 nt) are effectively partitioned and purified with the **Quick-RNA™** kit.

## Proteinase K Digestion

Example: up to 5 mg solid tissue or 10<sup>6</sup> animal cells in DNA/RNA Shield™  
2X Digestion Buffer<sup>3</sup>  
Proteinase K<sup>4</sup>

95 µl  
95 µl  
≥6 U

Prepare a Proteinase K reaction mix (see example above, scale-up as necessary). Incubate at 55°C for 30 minutes (e.g., pelleted white blood cells) or 1-3 hours (solid tissue). Then add 1 volume **RNA Lysis Buffer** and proceed to Sample Clearing (page 4).

# DNA PURIFICATION

## Purify DNA from PCR & other sources

### DNA Clean & Concentrator™ (DCC™)

- ✓ Recovery of ultra-pure DNA that is free of salts and contaminants.
- ✓ Small ( $\geq 6 \mu\text{l}$ ) elution volume.
- ✓ DNA is ideal for ligation, PCR, Next-Gen sequencing, etc.

Product	Size (Cat. No.)
DNA Clean & Concentrator™-5	50 Preps. (D4013) 200 Preps. (D4014)
ZR-96 DNA Clean & Concentrator™-5	2 x 96 Preps. (D4023) 4 x 96 Preps. (D4024)
Genomic DNA Clean & Concentrator™	25 Preps. (D4010) 100 Preps. (D4011)

High efficiency DNA recovery with the DCC™-5 compared to Supplier Q.

## Boost DNA recoveries from agarose gels to >80%

### Zymoclean™ Gel DNA Recovery

- ✓ Rapid (15 min.) recovery of ultra-pure DNA from agarose gels in  $\geq 6 \mu\text{l}$ .
- ✓ Ultra-pure DNA ideal for DNA ligation, sequencing, etc.
- ✓ Format also available for large DNA >20 kb.

Product	Size (Cat. No.)
Zymoclean™ Gel DNA Recovery Kit	50 Preps. (D4001) 200 Preps. (D4002)
Zymoclean™ Large Fragment DNA Recovery Kit	25 Preps. (D4045) 100 Preps. (D4046)

DNA fragments recovered from an agarose gel using the Zymoclean™ Gel DNA Recovery Kit. Lanes: M: DNA Ladder; 1-5: individual ladder DNA fragments.

## Recover transfection-quality plasmid DNA directly from culture

### Zyppy™ Plasmid Prep Kits

- ✓ The fastest, simplest method available for purifying high quality plasmid DNA from *E. coli*.
- ✓ Pellet-Free™ procedure omits conventional cell-pelleting and resuspension steps.
- ✓ Transfection quality plasmid DNA directly from culture in under 15 minutes.

**Easy, Pellet-free Procedure:** Add Lysis Buffer **Directly** to Bacterial Culture

Product	Size (Cat. No.)
Zyppy™ Plasmid Miniprep Kit	50 Preps. (D4036) 100 Preps. (D4019) 400 Preps. (D4020) 800 Preps. (D4037)

ELUTE**

# RNA PURIFICATION

Get RNA *directly* from TRIzol® without phase separation

**Clean-Spin™ Technology**

**What is Clean-Spin™ Technology?**

The spin columns from Zymo Research have been designed to ensure complete elution with no binding/wash buffer carryover. The result is ultra-pure inhibitor-free DNA and RNA.

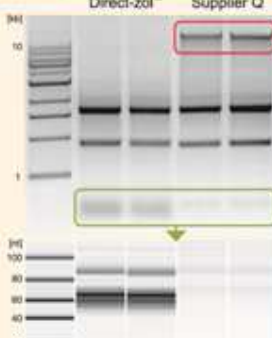

**Direct-zol™ RNA**

- ✓ For purification of high-quality small and large RNA *directly* from TRIzol®, TRI Reagent®, or similar.
- ✓ Bypasses phase separation and precipitation procedures allowing for unbiased recovery of miRNA

Product	Size (Cat. No.)
Direct-zol™ RNA MiniPrep	50 Preps. (R2050)
	50 Preps. (R2051)*
	200 Preps. (R2052)
	200 Preps. (R2053)*

*96-well and MagBead formats also available!*

DNase I included in all kits.  
\* Supplied with TRI-Reagent®

High-quality small and large RNA are effectively recovered with the Direct-zol™ kit. RNA is **DNA-free**.

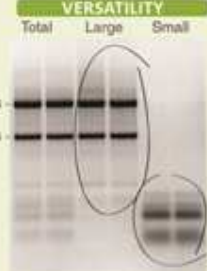

**Isolate DNA-free RNA from 1 to 10<sup>7</sup> cells in minutes**

**Quick-RNA™**

- ✓ Isolation of total, large, or small RNA – *You decide!*
- ✓ Ultra clean, high-quality RNA from a single cell to 10<sup>7</sup> cells.
- ✓ DNA-free RNA ideal for any downstream application – *DNase I included.*

Product	Size (Cat. No.)
Quick-RNA™ MicroPrep	50 Preps. (R1050)
	200 Preps. (R1051)
Quick-RNA™ MiniPrep	50 Preps. (R1054)
	200 Preps. (R1055)
ZR-96 Quick-RNA™	2 x 96 Preps. (R1052)
	4 x 96 Preps. (R1053)

**VERSATILITY**

Isolate total, large, or small RNA with the Quick-RNA™ kit.

**QUALITY**

RNA is DNA-free using the Quick-RNA™ kit.

**Purify RNA from enzymatic and labeling reactions in 5 minutes**

**RNA Clean & Concentrator™**

- ✓ Recover ultra-pure RNA in small (≥6 µl) elution volumes.
- ✓ Compatible with TRIzol®, phenol, chloroform, and RNase inhibitors (RNAlater®).
- ✓ RNA is ideal for RT-PCR, q-PCR, hybridization, arrays, RNA interference, etc.

Product	Size (Cat. No.)
RNA Clean & Concentrator™-5	50 Preps. (R1015)
	200 Preps. (R1016)
RNA Clean & Concentrator™-25	50 Preps. (R1017)
	100 Preps. (R1018)
ZR-96 RNA Clean & Concentrator™	2x96 well plates (R1080)
DNA-Free RNA Kit™	50 Preps. (R1013)
